SUMMARY

Information Technology undergraduate at CBIT (CGPA: 9.17) with strong foundations in Data Structures Algorithms (300+ LeetCode problems). Experienced in building AI-powered applications using Python, TensorFlow, LLMs, and RAG pipelines, along with scalable backend systems on AWS. Interested in Generative AI, Machine Learning, and Backend Engineering.

EDUCATION

Undergraduate: B.E., Information Technology CGPA: 9.17

Graduating May 2027

Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

AI/ML: Machine Learning, Deep Learning, TensorFlow, LLMs, RAG, Prompt Engineering, Vector Databases

Web Development: React.js, Node.js, Express.js, REST APIs, HTML, CSS

Cloud & Big Data: AWS (EC2, S3, Lambda), Google Cloud Platform, Apache Spark, Apache Kafka, Apache Hive, Pig

Databases: MySQL, MongoDB, SQLite, JDBC

Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), DBMS

Developer Tools: Git, GitHub Actions, Postman, VS Code

PROJECTS

Agri AI Advisory System | React.js | Node.js | MongoDB | RAG | TensorFlow

2025 – Present

- **GitHub:** github.com/MiniProjectII/agri-ai-advisory-system
- Designed a full-stack agricultural platform using **React.js**, **Node.js**, and **MongoDB**, training a **TensorFlow ANN** and **ResNet50 CNN** to recommend crops and classify soil images with over **95% accuracy**.
- Integrated a **multi-agent RAG chatbot** using the **Gemini 2.5 Flash API**, **Weather API**, and **Reddit API** to route agricultural queries to virtual domain experts, reducing response latency by **25%**.
- Engineered automated **entity-extraction pipelines** in **Python** and **Node.js** to build dynamic user memory profiles in **MongoDB**, increasing user query personalization and engagement by **40%**.

Digital Health Portfolio (AWS Deployed) | MERN | AWS | RAG | Gemini API

- **GitHub:** github.com/naveen-ramavath/Digital-Health-portfolio
- Deployed a full-stack **MERN** application on **AWS EC2** with **S3** for secure, encrypted storage of medical records, prescriptions, and health history.
- Scaled the backend to handle **300+ concurrent requests** using AWS Auto Scaling Groups and Application Load Balancer, achieving **99.9% uptime**.
- Integrated a **RAG pipeline** using vector search and the **Gemini API** to retrieve records and generate context-aware patient health insights, matching **10+ patient conditions** per query.

AWS CI/CD Blog Deployment System | AWS EC2 | GitHub Actions | Nginx | Linux

2025

- **GitHub:** github.com/naveen-ramavath/blog-auto-deploy
- Engineered an automated CI/CD pipeline using **GitHub Actions** and **AWS EC2**, reducing manual production code deployment time by **80%**.
- Configured **Nginx** reverse proxy, SSL/TLS certificates, and SSH authentication, securing application traffic and achieving **99.9% uptime**.
- Automated testing and bash script deployment processes, reducing integration and release-related issues by **45%**.

CERTIFICATIONS

- **LeetCode** — Solved 300+ DSA problems
- **Google Cloud Computing Fundamentals** — NPTEL, 2024
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** — Oracle, 2025
- **MongoDB Certified Associate Developer – Python** — MongoDB, 2025
- **Cloud Computing Internship Certificate** — InternPro, 2025
